

DevOps Engineer

Bandyer is a fast-growing reality, innovative and smart. We develop a video communication solution based on WebRTC to be integrated within any corporate environment and device! We are always looking for new talents to join our team and share our success; if you are ready for a new challenge and to give 100% for a great reality, here is what we are looking for.

We offer:

- Growing, young, dynamic team
- Personal and professional growth
- Flexibility and autonomy
- Passion
- Permanent contract

We look for:

Bandyer is now looking for a DevOps Engineer passionate about new technology and goal oriented. The resource will be responsible for the improvement and maintenance of the cloud infrastructure of Bandyer.

Requirements:

- 2-5 years of previous experience
- Good experience with load balancers (ELB, Nginx)
- Proficient knowledge of AWS (EC2, ECR, S3, ELB, KMS)
- Good knowledge of Docker
- Proficient knowledge of a container orchestration system (Kubernetes/OpenShift/others)
- Good knowledge of Ubuntu or Centos and Bash scripting
- Good knowledge of “infrastructure as code” and knowledge of infrastructure orchestration (Terraform/Ansible/Puppet/Chef/Cloud Formation)
- Proactive approach and ability to work autonomously

Nice to have:

- Computer engineering degree or similar
- Experience with RTC based application deployment and scalability
- Good knowledge of node.js
